

“ We noticed that Tour pros and better amateurs hit their 3-wood off the tee a lot more frequently than from the fairway, so we embraced that insight and used our cutting edge metalwood technology to create a club that is designed for the tee, with a size that fits in between 3-wood and driver. ”

BRIAN BAZZEL
SENIOR DIRECTOR
METALWOOD PRODUCT CREATION

Finally, a 3-wood Designed for the Tee

- ▶ 260cc steel head is larger than a 3-wood yet smaller than a driver. Low-forward CG promotes low spin for outstanding distance when you loft up.
- ▶ Speed Pocket increases ball speed and reduces spin to promote distance; Inverted Cone technology expands the clubface area that delivers fast ball speed.
- ▶ Shorter, 3-wood length shaft promotes excellent control.
- ▶ Matte silver crown and black button-back makes accurate face alignment easy.
- ▶ Three lofts 12°, 14° and 16°
- ▶ Two models: Standard with light, driver-weight shaft, TP with heavier, 3-wood-weight shaft.

SLDR S Mini Driver's face is deeper than a traditional 3-wood, allowing for forgiveness off the tee.
