

## The Ultimate Union of Speed and Precision

- Art and science converge to create the ultimate combination of speed, stability and clean design.
- Ideal iron for the better player who wants maximum performance technology in a compact and elegant head shape.
- Speed Pocket™ in 3- through 7-irons increases ball speed low on the face to deliver more consistent ballspeed and launch conditions across the entire face.
- Beautifully shaped sole for better players who prefer slightly more effective bounce.
- Compact short-irons with minimal offset, slightly larger mid- and long-irons with progressively more offset.
- Stronger lofts due to higher launch angle generated by the Speed Pocket for an optimal combination of distance and controlled trajectory.
- Hand-polished satin nickel-chrome finish preferred by better players.
