

“ We were faced with the challenge of creating a smaller head that still produces the distance and forgiveness golfers would expect from an M2 product. By incorporating advanced technologies while maintaining a clean aesthetic, we were able to craft this compact, yet powerful club.

BRET WAHL
VICE PRESIDENT R&D – IRONS

SMALL PROFILE. BIG DISTANCE.

► Maximized Distance and Trajectory. Optimized Look and Feel.

- Shaped with a modern profile and minimum offset, each iron features a compact design with powerful performance. A new sole design provides a clean look at address while allowing precise turf interaction.
- By employing a 360° undercut, mass has been redistributed for a lower CG and a larger unsupported face. This delivers increased ball speed and a high peak trajectory.
- Our Speed Pocket and Inverted Cone technologies provide improved performance on off-center hits to deliver consistent distance.
- A light yet stiff 3D badge design dampens vibration to help produce and maintain exceptional sound and feel.

SHAFT

Steel - True Temper XP 95 (S300, R300)
Graphite - **CUSTOM ONLY**
