FEATURES AND BENEFITS

ADVANCED MULTI-MATERIAL CONSTRUCTION chromium carbon, steel, tungsten and titanium work together seamlessly creating the perfect blend of form and function.

NEW ASYMMETRIC 40G WEIGHT can slide from front to back and be rotated 180° for additional CG movement, unlocking another level of performance.

NEW TSS WEIGHTING SYSTEM has been integrated in all lofts allowing for precise swing weight adjustment during stock and custom assembly.

TOUR INSPIRED SHAPE with Twist Face®, Thru-Slot Speed Pocket™, 4° loft sleeve, and infinity carbon crown provide the ultimate suite of technologies.
