

DRAW WITH A TWIST

“The M6 D-Type provides all the class-leading performance of the M6 fairway woods but with additional draw-bias for the golfer looking to avoid that dreaded shot that peels off to the right. This is new in our offering for 2019 and we think it will be a game-changer for many golfers.”

Tomo Bystedt | Senior Director Product Creation

TWIST FACE™

- Twist Face is a revolutionary face curvature with a corrective face angle on off-center hits, engineered to reduce side spin and deliver straighter shots
- Unique Twist Face geometry specifically designed for the inertia properties of the M6 fairway wood
- First time in a fairway wood to help increase distance and improve accuracy from the tee or off the turf

DRAW-BIASED, EASY TO LAUNCH

MULTI-MATERIAL CONSTRUCTION

- New head design with a deep face and larger carbon crown provides optimal distance with excellent playability
- Discretionary mass is concentrated low in the head to optimize CG while maintaining high MOI

ADVANCED SPEED POCKET™ DESIGN

- Improved slot flexibility for a larger COR area and better off-center performance, especially on low-face strikes
- New TPU slot insert is more flush with the surface for improved turf interaction

DRAW-BIASED DESIGN

- Divergent face masking and modified internal weighting for additional draw-bias in the ball flight
