MINI DRIVER

CONTROL. POWER. CONFIDENCE.

40 YEARS IN THE MAKING

In 1979, golf was changed forever with the introduction of the Pittsburgh Persimmon™ - the original metalwood. For the past 40 years, TaylorMade has continued that legacy of innovation with game-changing technologies, engineered to help golfers perform at their best. The Original One Mini Driver incorporates that heritage of innovation with key performance technologies, packed into a confidence-inspiring shape that delivers on distance, forgiveness and accuracy.

DESIGNED TO INSPIRE

- Off the tee, the Original One Mini Driver delivers a combination of excellent distance and accuracy, but with more control and forgiveness than a fairway wood
- Faster swing speed players can benefit from ease of use off the deck with a combination of face height and CG--this club is designed to be our longest metalwood offering that is still playable from the fairway

COMPLETE PERFORMANCE PACKAGE

- Twist Face™ technology provides the ultimate path to straight distance
- Revolutionary tri-material body, (titanium, 50-gram steel sole plate, carbon crown) delivering ultra-low CG for distance and playability from the tee and the fairway
- Speed Pocket™ is designed for additional flexibility below center face to generate distance with less backspin
- 12-position Loft Sleeve™ with 4° of total adjustability
